

Torque Data

Benefits you can bank

We've made our Fleet Risk Management service even better. Torque Data, our new interactive online risk management tool, provides you with ongoing effective crash analysis to help you to identify trends and solutions that reduce accidents and claims.

Developed in consultation with heavy motor fleet owners, this unique tool also provides members with instant access to industry benchmarking information, 24/7.

Through better managing risk, you'll reap the rewards with improved operational efficiency and a better bottom line.

Managing your risk made easy

Torque Data's user-friendly features make managing your risk easy.

1. Record and monitor crashes and incidents
2. View your vehicle crash claims history
3. Record and monitor carriers liability events
4. Review carriers liability claims history
5. Record and maintain staff and staff training details
6. Record and maintain fleet details
7. Record, store and report on fleet repairs and maintenance information
8. Record and maintain fleet expenditure recording
9. Provide comprehensive reports including:
 - Application reports on selected company specific information
 - Company reports including financial analysis, crash analysis, road statistics analysis and comparisons between divisions or branches.

- Benchmark reports, with financial analysis, crash analysis and road statistics analysis, comparisons between similar sized operations and other transport operators in a similar environment.

Keeping your information secure

Our secure system keeps your information safe with access through confidential usernames and passwords. And every user is checked and validated when logging on by Torque Data's security software.

Permission levels can also be granted to provide individuals at the same company with access to different types of information.

We're here to help
